In the Specification:

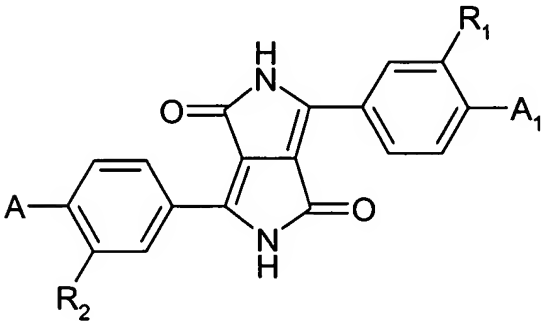
Please amend the specification by inserting the following section following the first full paragraph of page 3 of the disclosure:

Brief descriptioin of the drawing:

Figure 1 is a UV/Vis Spectrum of the pigment of formula 100 prepared in Example 1b.

Please amend the specification by replacing the paragraph bridging page 3 and 4 with the following amended paragraph :

The present invention accordingly relates to a high-molecular-weight polymeric material comprising at least one diketopyrrolopyrrole pigment (DPP pigment) of formula



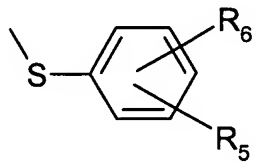
(1)

wherein

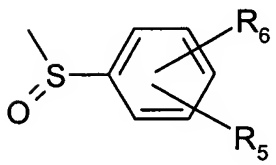
R_1 is hydrogen, chlorine, methyl, methoxy, CF_3 or CN,

R_2 is hydrogen, chlorine, methyl, methoxy, CF_3 or CN,

A is hydrogen, chlorine, methyl, methoxy, CF_3, CN, unsubstituted or substituted phenyl or a radical of formula

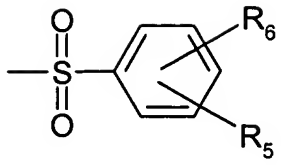


(2),



(2a)

or



(2b),

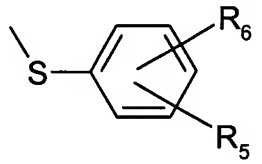
wherein

R_5 is hydrogen, chlorine, methyl, methoxy, nitro, CF_3 or CN and

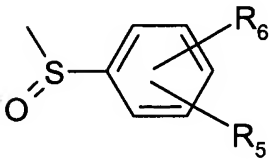
R_6 is hydrogen, chlorine, methyl, methoxy, nitro, CF_3 or CN, or

R_5 and R_6 together with the phenyl ring to which they are bonded form an aryl or a heteroaryl ring and

A_1 is a radical of formula

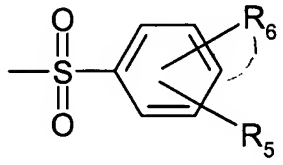


(2),



(2a)

or



(2b),

wherein

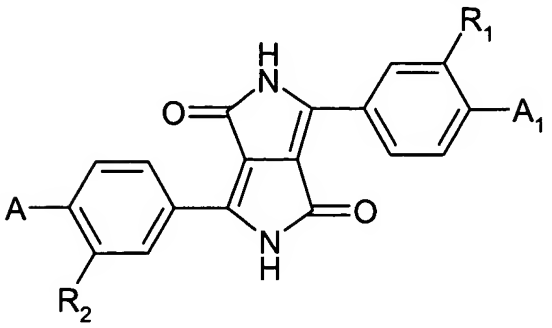
R_5 is hydrogen, chlorine, methyl, methoxy, nitro, CF_3 or CN and

R_6 is hydrogen, chlorine, methyl, methoxy, nitro, CF_3 or CN, or

R_5 and R_6 together with the phenyl ring to which they are bonded form an aryl or a heteroaryl ring.

Please amend the specification by replacing the paragraph bridging page 5 and 6 with the following amended paragraph :

The present invention further relates to diketopyrrolopyrrole pigments of formula (1)

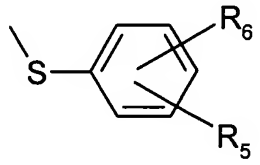


(1), wherein

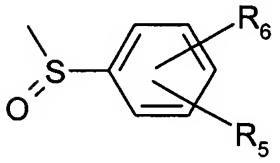
R_1 is hydrogen, chlorine, methyl, methoxy, CF_3 or CN,

R_2 is hydrogen, chlorine, methyl, methoxy, CF_3 or CN,

A is hydrogen, chlorine, methyl, methoxy, CF_3, CN, unsubstituted or substituted phenyl or a radical of formula

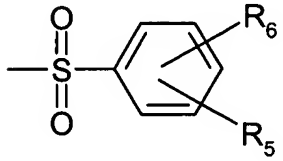


(2),



(2a)

or



(2b),

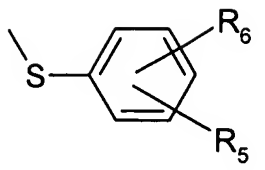
wherein

R_5 is hydrogen, chlorine, methyl, methoxy, nitro, CF_3 or CN and

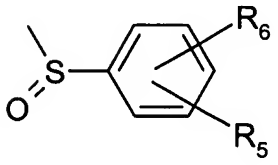
R_6 is hydrogen, chlorine, methyl, methoxy, nitro, CF_3 or CN, or

R_5 and R_6 together with the phenyl ring to which they are bonded form an aryl or a heteroaryl ring and

A_1 is a radical of formula

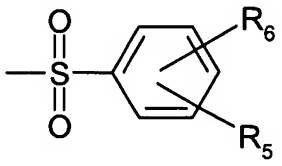


(2),



(2a)

or



(2b),

wherein

R_5 is hydrogen, chlorine, methyl, methoxy, nitro, CF_3 or CN and

R_6 is hydrogen, chlorine, methyl, methoxy, nitro, CF_3 or CN, or

R_5 and R_6 together with the phenyl ring to which they are bonded form an aryl or a heteroaryl ring,

with the proviso that, when both of A and A_1 are a radical of formula (2), R_5 cannot be hydrogen and R_6 cannot be methyl bonded in the 4-position.
